

Job ads Import

Post higher amount
of job ads carefree

Besides posting job ads manually, Profesia.sk offers to publish them automatically, directly from your applicant tracking system. Just ask for Job ads import.

More than 990 000 visitors per month

Profesia.sk has become synonymous to a place with new job opportunities. One job ad has an average of 400 views.

Post more job ads automatically

Job ads import is suitable for middle to large companies, which regularly post a higher amount of job ads.

Save your time

Job ads post themselves automatically, there is no need to post them manually.

Support and import maintenance

We will help you with first configuration of your import. Also, in case of a problem, we offer technical support.

How to set up your job ads import

These are the conditions for job ads import activation:

- You need to have an active Credit package.
We suggest choosing a package high enough to post job ads for a whole year.
After your credits will be spent, your job ads will not publish.
- Make sure, that your HR system provider supports the possibility to import job ads on Profesia.sk.

Options for job ads import:

1. Profesia API

API is the most efficient way how to import your job ads. They will be imported right after you put them into your ATS. Communication between your system and Profesia system is carried out through API calls. This way the applications communicate directly, which leads to minimizing the possibility of mistakes. Your job ads will be posted on Profesia.sk as soon as you put them into your system. The actualization of code lists is dynamic as well.

Supported applicant tracking systems (ATS):

● partnerské ATS

● multipostingové služby

If you use ATS, which is not able to export job ads, you can choose multiposting services, that will help you to import them.

See the list of supported ATS for multiposters:

- eQuest (<https://www.equest.com/partners/>)
- Broadbean (<https://www.broadbean.com/uk/partners/>)

2. XML feed

Two ways, how the XML import works:

- Import as drafts – job ads are imported to Profesia as drafts, meaning you can check them before posting online and publish them whenever you want
- Import with instant posting – job ads are published according to the following rules: new job ads will be added on the page, already posted job ads will update, already posted job ads that are not in the new XML file will be deleted from the page. XML import updates 4 times per day.

Check if your system is compatible with Profesia.sk. If you use different system, feel free to contact us and our specialists will tell you the possibilities of setting up the imports.
